CHAI SRH Training of Community Influencers – Evaluation

CONSENT FORM

[Read the following to the respondent.]

Thank you for taking the time to meet with us. My name is _____, and I am working for Clinton Health Access Initiative (CHAI). Thank you for participating in this assessment. The SMOH and CHAI are asking questions of community representatives such as yourself in your state.

We are assessing the effectiveness of the training of leaders on child spacing in your community. If you agree to participate, we will be asking you questions about yourself and your ideas, attitudes, and behavior on various issues. There are no wrong answers to these questions, we are simply interested in finding out what community representatives think about healthy spacing and timing of pregnancies. This information will be used to help develop better health services for families in our country. If you decide that you do not want to participate or decide at any time during the interview that you do not want to participate, it will not affect the services you receive now or in the future. While the results of this assessment may be published, your privacy will be protected and you will not be identified in any way. Your opinions and experiences are important to us, so please be honest and truthful in answering our questions. Your answers will be confidential and secret. Some of the questions in the assessment are personal. If you are uncomfortable with a question, you do not have to answer it if you do not want. You may also stop the assessment at any time. It will take about 15 minutes to complete the questionnaire.

If you have any questions about the evaluation in the future, please feel free to contact SMOH or CHAI.

At this time, do you want to ask me anything about the survey?

Consent Signature: _____

For each statement that follows, please tell me if you agree or disagree

No.	Question	Response Codes
A101	Practicing healthy timing and spacing helps a woman regain her strength before having her next baby	Strongly Disagree..... <input type="checkbox"/> Disagree..... <input type="checkbox"/> Not sure..... <input type="checkbox"/> Agree..... <input type="checkbox"/> Strongly Agree <input type="checkbox"/>
